AT LEXINGTON
ROBERT R. CARR
CLERK U.S. DISTRICT COURT

Reason: My Civil rights have been violated

On June 24, I was at Loves truck stop in Tolleson AZ and they refused to serve me, possibly because of my gender, color and race. I asked for a shower and they refused to give it to me, without an explanation despite the fact that showers were always an essential service for truck drivers throughout the pandemic. I waited for at least 6 hours, checking back in every hour for a shower because I assumed that they were either short on staff or experiencing technical difficulties. However, that was not the case. Instead, the manager assumed that I had no business requesting a shower so s/he called the ambulance on me without telling me anything.

The ambulance came, with at least 6 officers and I explained to them that all I wanted was a shower, and if they do not want to serve me, they should let me go in peace to get a shower elsewhere. But, the ambulance refused to let me go. Instead, the officers grabbed me and took me to the hospital against my will. I protested peacefully the whole time, asking them to let me go because there has been misunderstandings, but they didn't believe me.

When we got to the hospital, I was taken to ER and several nurses decided to anesthetize me. None of them introduced themselves to me, and they didn't tell me why they decided to poke needles in me. I was completely conscious and cooperative but none of them asked me any relevant questions aside from "where are you?". Unfortunately, I had no good answer for that question because I had no clue of the exact place, or the name of the hospital that the ambulance took me to.

I also do not know what the officers did to my belongings because I was unable to find them after the incident. I also don't know what the hospital staff did to me while I was unconscious. As far as I am concerned, they might have injected me with coronavirus because I had no one watching over me and my stuff during the time that they knocked me unconscious against my will.

A few weeks after that, I noticed transactions on my debit card that I did not authorize. I went to dispute them at my bank and they were all denied because they were "valid online transactions". As far as I know, anyone could have grabbed my wallet and used my sensitive information.

In summary, I would like my cash back immediately to pay my overdue bills. I also want to sue loves for discrimination, fire department for infringing on my freedom, and the hospital for medical malpractice. Since this incident, I have been depressed, extra paranoid, and I haven't been able to get back to work and now I have credit card bills piling up. I need immediate help. I cannot wait much longer, I'm financially squeezed to a breaking point.
